Customers

Developers

OUTPUTS

Company in a Box

Agentic Workflows

Quality & Safety

Ecosystem Products

Agentic Business Operating System

Coordinate people, agents, and systems with a shared memory and goals.

Company in a Box

Launch and run a full company—from strategy to execution—out of the box.

Closed-Loop Quality

Continuously evaluate, learn, and improve across every workflow and output.

Hybrid Compute Fabric

Access the right compute, at the right time, anywhere in the world.

1. MARKET OPPORTUNITY

The agentic era is the **next computing shift**.

\$1.3T+

AI Agents Market
by 2030

\$8T+

Enterprise Automation

\$20T+

Global AI & Compute
Economy by 2030

50B+

Connected Devices
Powering the Stack

\$30T+

Tokenized AI, Data &
Digital Ownership by 2030

One OS. Infinite Agents. Limitless Impact.

2. WHY NOW?

Convergence of **technology**, **demand**, and **infrastructure**.

AI MATURITY

Models, tools, and capabilities have reached an inflection point.

ENTERPRISE DEMAND

Businesses need agents, automation, and intelligent workflows—now.

COMPUTE SHIFT

Decentralized compute and tokenized infrastructure are unlocking scale.

FRAGMENTATION

Too many tools, platforms, and subscriptions create massive inefficiency.

AGENTIC ERA

The next operating system must be unified, open, and agent-native.

INFRASTRUCTURE TRANSFORMATION

AI, data, and compute are becoming the new economic backbone.

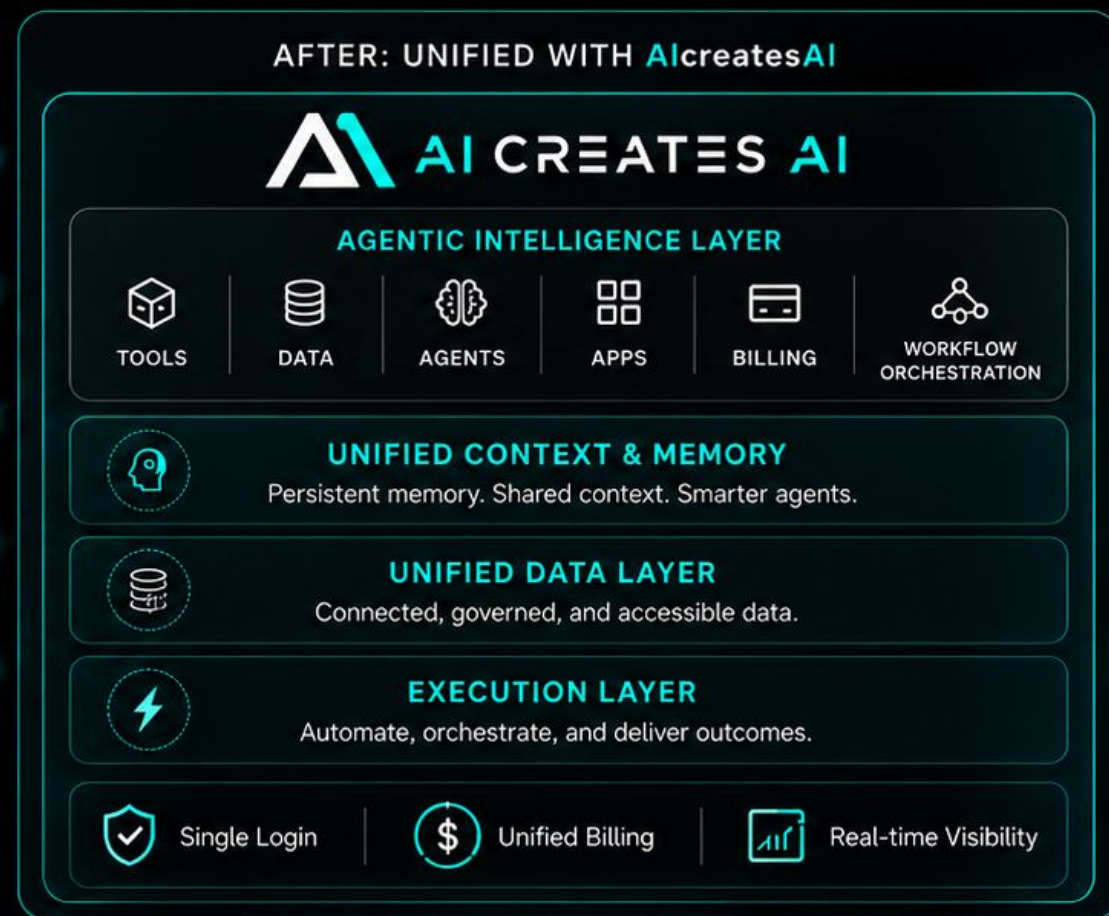

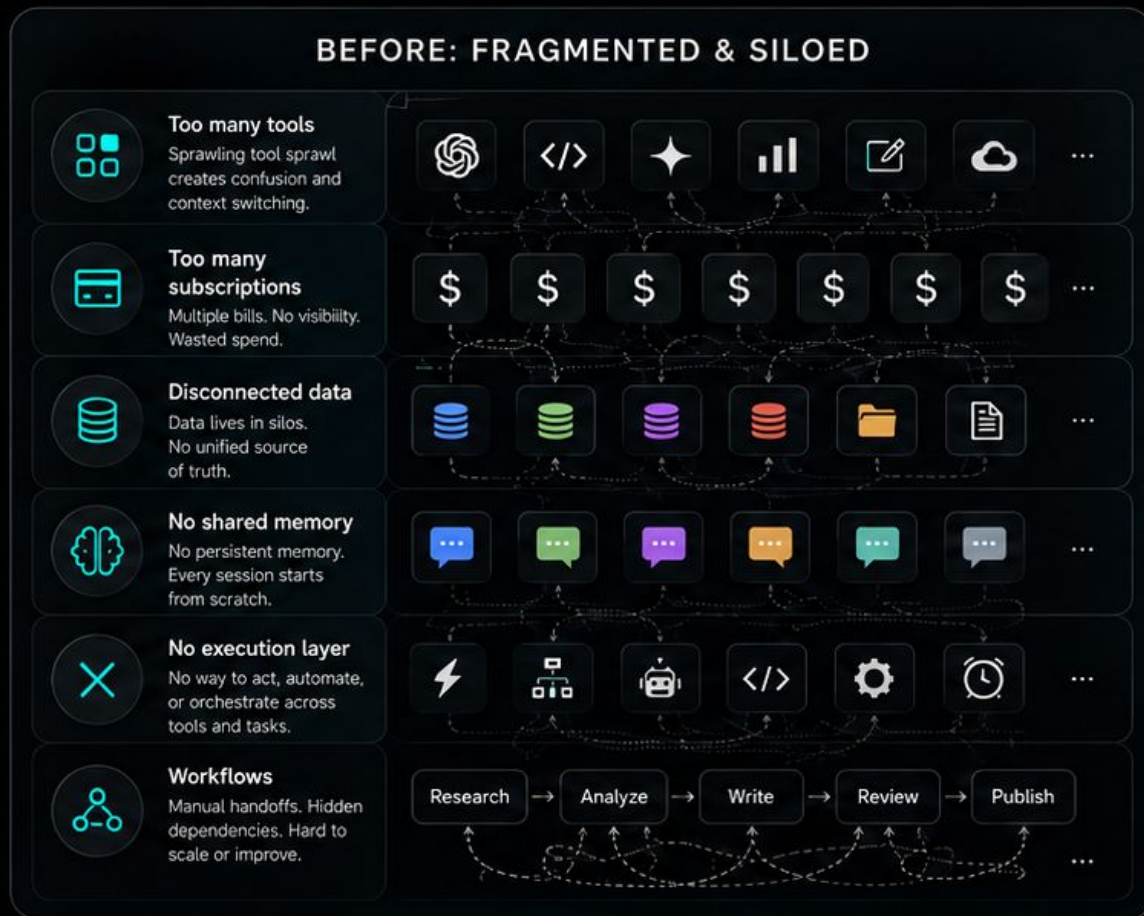

The world doesn't need another tool.
It needs an operating layer.

The Problem: AI Is Powerful but Fragmented.

Today's AI landscape is broken. Tools, data, and workflows are siloed—creating friction, cost, and complexity.

One system. One context. Limitless outcomes.

3. COMPETITIVE LANDSCAPE

AlcreatesAI is the **only unified operating layer** for agents.

	 AI CREATES AI UNIFIED OPERATING LAYER	OPENAI Assistants API	GOOGLE Vertex AI	MICROSOFT Copilot Studio	AUTOGEN Framework
 Unified OS for All Agents	 Yes. One OS for All agents.	☐ Partial	☐ Partial	☐ Partial	☒ No
 Unified Memory & Intelligence	 Yes. Persistent & shared.	☐ Partial	☐ Partial	☐ Partial	☒ No
 Unified Tools & Services	 Yes. All tools, one layer.	☐ Limited	☐ Limited	☐ Limited	☐ Partial
 Unified Execution Layer	 Yes. Secure & verifiable.	☒ No	☒ No	☒ No	☒ No
 Tokenized Ownership	 Yes. Built-in tokenization.	☒ No	☒ No	☒ No	☒ No
 Unified Economic Layer	 Yes. Economic coordination.	☒ No	☒ No	☒ No	☒ No
 Infrastructure Ownership	 Yes. Layer-1 ownership.	☒ No	☒ No	☒ No	☒ No
 Data Sovereignty	 Yes. You own your data.	☒ No	☒ No	☒ No	☒ No
 End-to-End Monetization	 Yes. Full-stack monetization.	☐ Limited	☐ Limited	☐ Limited	☒ No
 True Interoperability	 Yes. Model & platform agnostic.	☐ Limited	☐ Limited	☐ Limited	☒ Partial

AlcreatesAI isn't another tool. **It's the foundation.**
The only unified operating layer for the entire agentic economy.

The Solution: The Agentic Business Operating System

A unified operating layer that turns business objectives into continuously improving execution, orchestration, and outcomes.

One platform. Infinite adaptability.

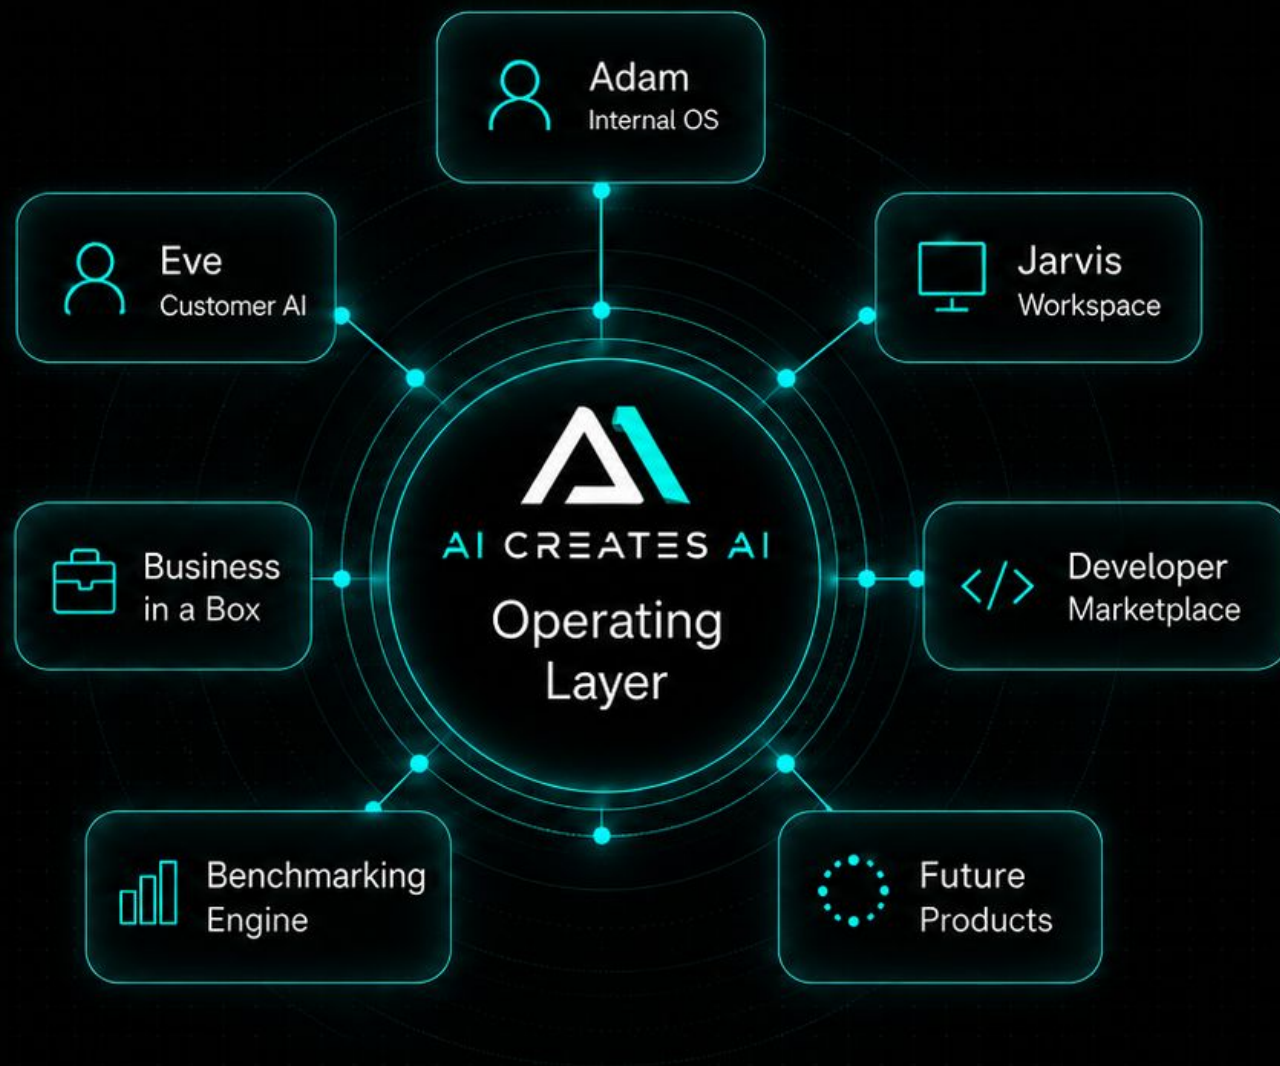

Every cycle makes the system smarter, faster, and more aligned to your business.

• AGENTIC BUSINESS OPERATING SYSTEM

Bringing Enterprise-Grade AI to Everyone

A unified AI infrastructure layer designed to launch, operate, and connect multiple AI-powered products.

Hybrid Compute Fabric

Closed-Loop Quality Engine

Self-Improving Workflows

Product and Subsidiary Ecosystem

One operating layer.

Multiple products. Shared intelligence, credits, data, and execution.

EVE OS serves as the business-in-a-box operating system, powering first-party products, vertical applications, and future subsidiaries across the AI economy.

Designed to launch initial products fast, unify intelligence across the ecosystem, and expand into future subsidiaries at scale.

Adam, Eve, and Jarvis

Three core intelligence systems. One orchestrated AI operating ecosystem.

Adam

Executive / CEO Intelligence

Designed for leadership, company oversight, planning, and enterprise decision-making.

- ✓ Executive reasoning & strategy
- ✓ Company operations oversight
- ✓ Orchestration & approvals
- ✓ Governance, risk & evaluation

Specialist models

Eve

Customer Experience Intelligence

Customer-facing intelligence for onboarding, engagement, service, and relationship management.

- ✓ Customer onboarding
- ✓ Support & concierge AI
- ✓ Sales and communication flows
- ✓ Personalization & retention

Specialist models

Jarvis

Workspace & Execution Intelligence

The user workspace for tools, workflows, services, and everyday business execution.

- ✓ Business workspace
- ✓ Tools & service access
- ✓ Tasks, workflows & automation
- ✓ Productivity & execution layer

Specialist models

Unified Agent Layer

Shared memory • Shared tools • Shared credits • Shared data • Shared orchestration

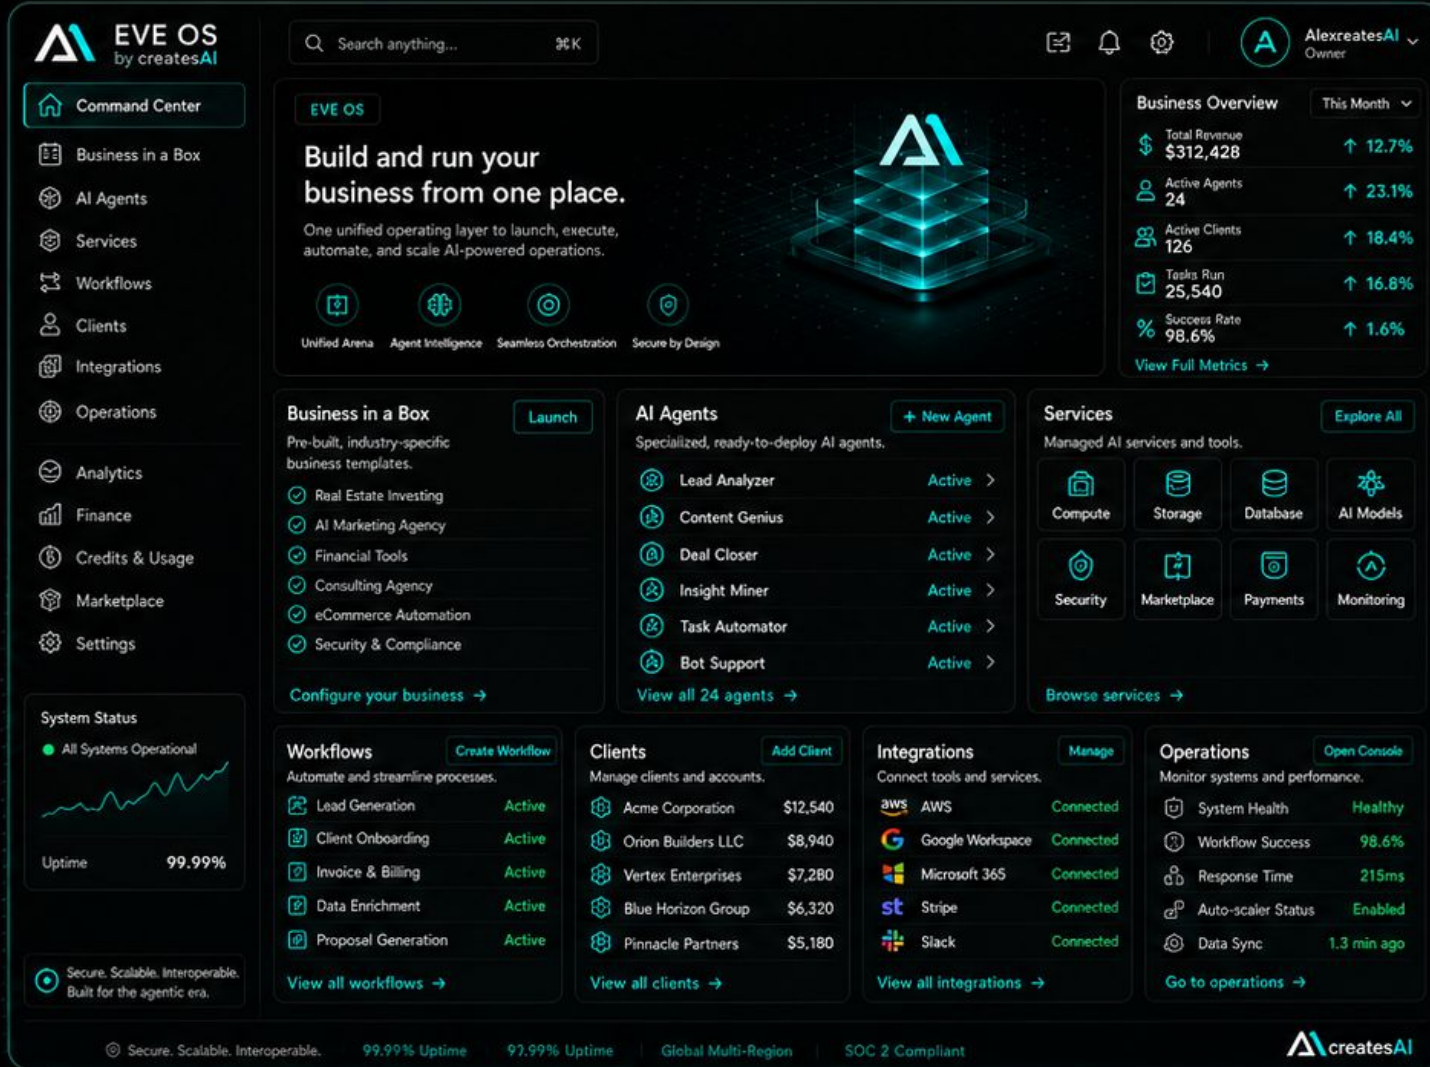

Sub-Agents, Model Training, and Benchmarking

ONE CORE. MANY SPECIALIST INTELLIGENCES. CONTINUOUS IMPROVEMENT AT SCALE.

EVE OS Product Experience

Desktop command center and mobile operating layer.

1

COMMAND CENTER

Unified desktop command center to manage, monitor, and scale your entire AI-powered business.

2

AI AGENTS & SERVICES

Access and orchestrate intelligent agents and powerful services from one integrated OS.

3

BUSINESS-IN-A-BOX ACTIVATION

Launch and scale your business in minutes with prebuilt infrastructure, agents, and tools.

ONE OS. EVERY SURFACE. LIMITLESS POSSIBILITIES.

Business in a Box Journey

One operating layer. Complete business launch path. Unlimited scale.

From setup to execution, every business runs on one layer.

Company in a Box

Select a business objective and let **EVE OS** assemble your company stack — agents, workflows, wallets, payments, marketing, legal, accounting, and dashboards.

One operating layer.

From idea to launch in minutes.

Launch in Minutes

Go from idea to operating business fast.

AI-Orchestrated

EVE OS assembles and runs everything.

Enterprise Grade

Secure, compliant, and production ready.

Scale with Confidence

Built to grow, adapt, and optimize.

Company in a Box

AI-orchestrated business assembly from idea to launch.

Business Launch

1

Choose Objective

Pick a business objective that matches your goals.

2

Activate Modules

EVE OS activates the modules you need.

3

Generate Brand + Stack

We create your brand, apps, workflows & infrastructure.

4

Deploy AI Agents

Specialized agents go live and start working.

5

Launch Workspace

Your complete business is live and ready.

Token Economy and Tokenized AI Access

The token coordinates access, usage, rewards, and ecosystem participation.

Access

Usage

Rewards

Participation

One token layer coordinating access, incentives, and ecosystem activity.

\$AICA Token Utility Map

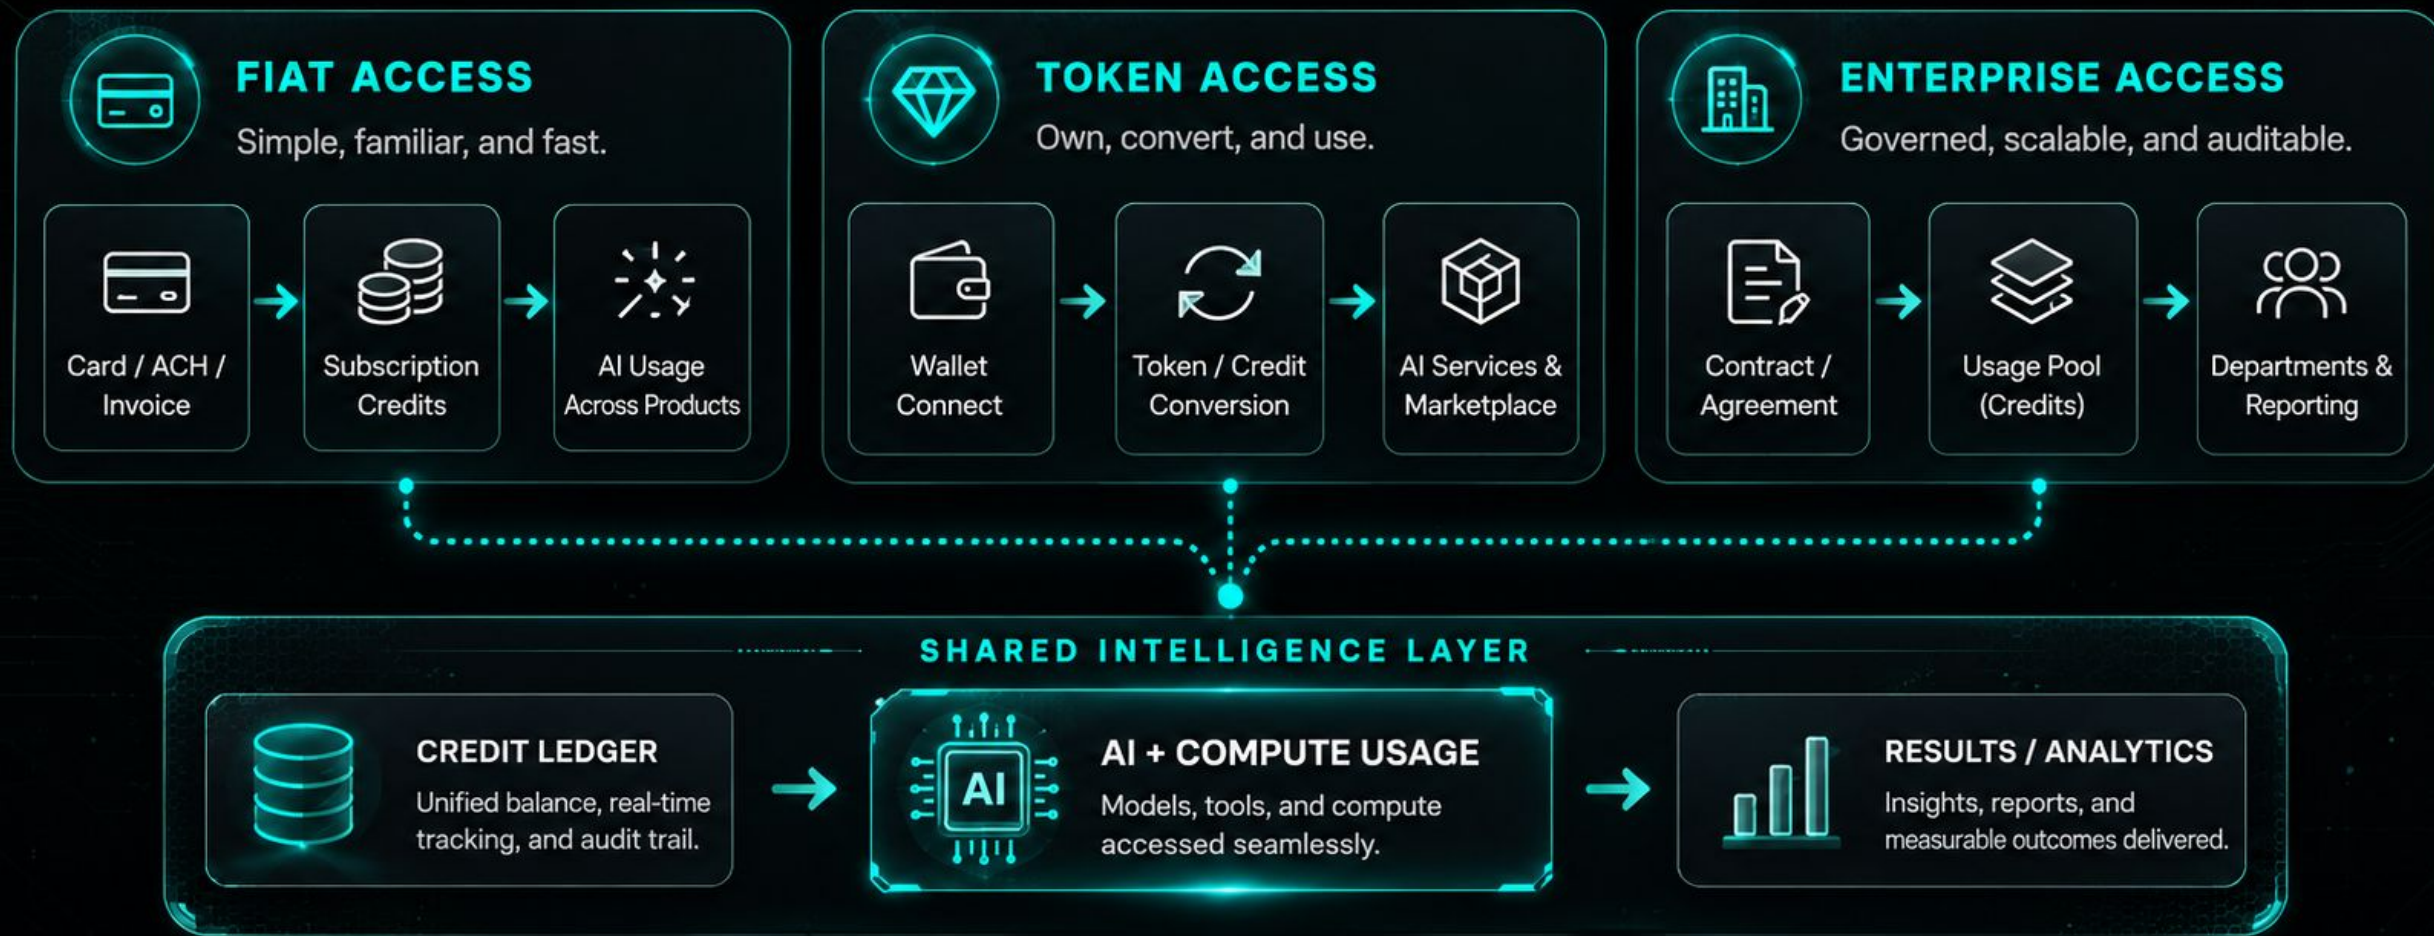

A utility and coordination token designed to power participation across the ecosystem.

\$AICA is a utility and coordination token — not the product itself.

Access Paths: Fiat, Token, and Enterprise

Three ways in. One intelligence layer.

Money, Credit, and Token Movement

The system separates fiat billing, credits, usage, rewards, and token vesting into a coordinated operating flow.

PRIVATE SAFT ROUND SCHEDULE

2,250,000,000 AICA (22.50% of supply) • \$50,000,000 raise

Strategic Seed — bonuses apply at \$5k (+10%) and \$25k (+20%)

ROUND

TARGET RAISE

PRICE

TOKENS SOLD

% SUPPLY

1	Strategic Seed	\$5,000,000	\$0.010 per AICA	500,000,000 AICA	5.00%
2	Private Round 1	\$12,000,000	\$0.015 per AICA	800,000,000 AICA	8.00%
3	Private Round 2	\$18,000,000	\$0.020 per AICA	650,000,000 AICA	6.50%
4	Infrastructure / Strategic	\$10,000,000	\$0.026 per AICA	230,769,231 AICA	2.31%
5	Community / Launchpad	\$5,000,000	\$0.034 per AICA	69,230,769 AICA	0.69%

TOTAL PRIVATE SALE

2.25B
AICA

TOTAL RAISE

\$50M

TOTAL SUPPLY SHARE

22.50%

A staged private sale designed to fund infrastructure while preserving long-term ecosystem alignment.

18. VESTING & UNLOCK SCHEDULE

Earlier investors receive lower pricing and longer alignment; later rounds unlock faster with controlled supply.

ROUND	TGE UNLOCK	CLIFF	LINEAR VEST	TOTAL DURATION
 Strategic Seed \$0.010 • 500,000,000 AICA	10% at TGE	3-month cliff	12-month linear	15 months
 Private Round 1 \$0.015 • 800,000,000 AICA	15% at TGE	2-month cliff	10-month linear	12 months
 Private Round 2 \$0.020 • 900,000,000 AICA	20% at TGE	2-month cliff	7-month linear	9 months
 Infrastructure / Strategic \$0.026 • 384,615,385 AICA	25% at TGE	1-month cliff	5-month linear	6 months
 Community / Launchpad \$0.034 • 147,058,824 AICA	30% at TGE	0-month cliff	3-month linear	3 months

Vesting begins at TGE. After each round's cliff, the locked portion unlocks in equal monthly installments.

Final schedules, eligibility, and distribution mechanics may be adjusted in the SAFT and offering documents.

4. REVENUE STREAMS

Multiple streams. **One** exponential ecosystem.

SUBSCRIPTIONS

EVE OS plans for individuals, teams, and enterprises.

USAGE CREDITS

Pay-per-use for tools, agents, compute, and workflows.

ENTERPRISE LICENSES

Custom deployments, integrations, and white-label solutions.

MARKETPLACE FEES

Skills, agents, apps, models, and data transactions.

COMPUTE ACCESS

GPU, inference, and fine-tuning compute marketplace.

FINN AI PRODUCTS

Financial services, credit, and investment products.

VALIDATOR REWARDS

Network security, validation, and infrastructure.

TOKEN UTILITY

Staking, governance, payments, and ecosystem utility.

STRATEGIC PARTNERSHIPS

Co-marketing, revenue share, and joint go-to-market.

Diversified. Scalable. Built for the **infinite agent economy**.

Business Model, Pricing, and Revenue Streams

The platform is product-first: **recurring software revenue first**, token utility second.

SaaS Subscription

Tiered access to platform modules and capabilities.

 **Recurring**

Enterprise Deployment

Private deployment, SSO, compliance, and support.

 **Recurring**

AI Credit Packs

Prepaid credits for AI compute and inference.

 **Usage-Based**

Marketplace Fees

Transaction and listing fees on the platform marketplace.

 **Usage-Based**

Managed Services

Custom builds, integrations, and strategic engagements.

 **Project**

App Builder Credits

Credits for building, testing, and deploying applications.

 **Usage-Based**

Data / Trading Products

Access to premium datasets, signals, and analytics.

 **Recurring**

Financial Product Partner Economics

Revenue share and distribution from financial products.

 **Partner**

Intelligence Engine: Specialized Models, Hermes-Style Agents, and Swarms

Persistent agents, model routing, memory, and coordinated swarms turn AI into reliable execution.

PERSISTENT CONTEXT

Memory + identity enable continuity across sessions, tasks, and teams.

MULTI-AGENT COORDINATION

Agents collaborate through roles, goals, and protocols to solve complex work.

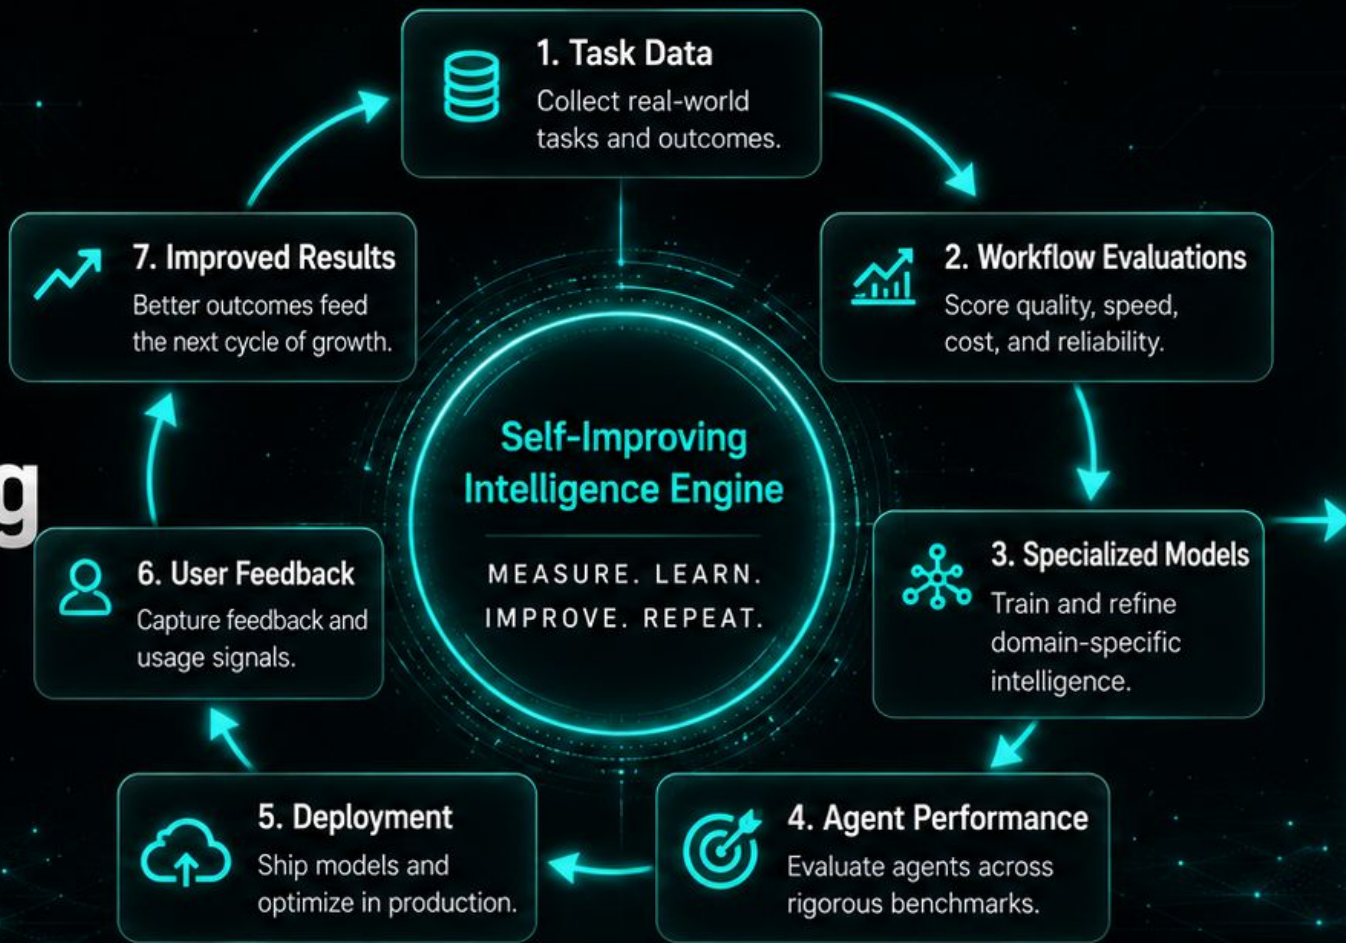

CLOSED-LOOP LEARNING

Outcomes feed back into models, agents, and routing to continuously improve.

Intelligence Growth and Benchmarking

A measurable, self-improving engine that compounds performance across every specialized domain.

Goal:
Top-Tier Specialized Performance

Best-in-class results across every benchmark, continually improving.

BENCHMARK FOCUS AREAS

Coding

Accuracy, reliability, and code quality at scale.

App Development

End-to-end build success, performance, and maintainability.

Business Automation

Workflow efficacy, cost per task, and time saved.

Data Analytics

Insight accuracy, latency, and explainability.

Customer Support

Resolution quality, response time, and satisfaction.

Continuous Benchmarking

Transparent Metrics

Real-World Validation

Benchmarking Pipeline

How AICreatesAI measures, improves, and deploys specialized intelligence.

RIGOROUS & REPRODUCIBLE

Standardized datasets and evaluations ensure consistent, credible results.

FAIR & TRANSPARENT

Multi-metric scoring and human review reduce bias and increase trust.

DATA-DRIVEN IMPROVEMENT

Closed-loop feedback continuously enhances models and datasets.

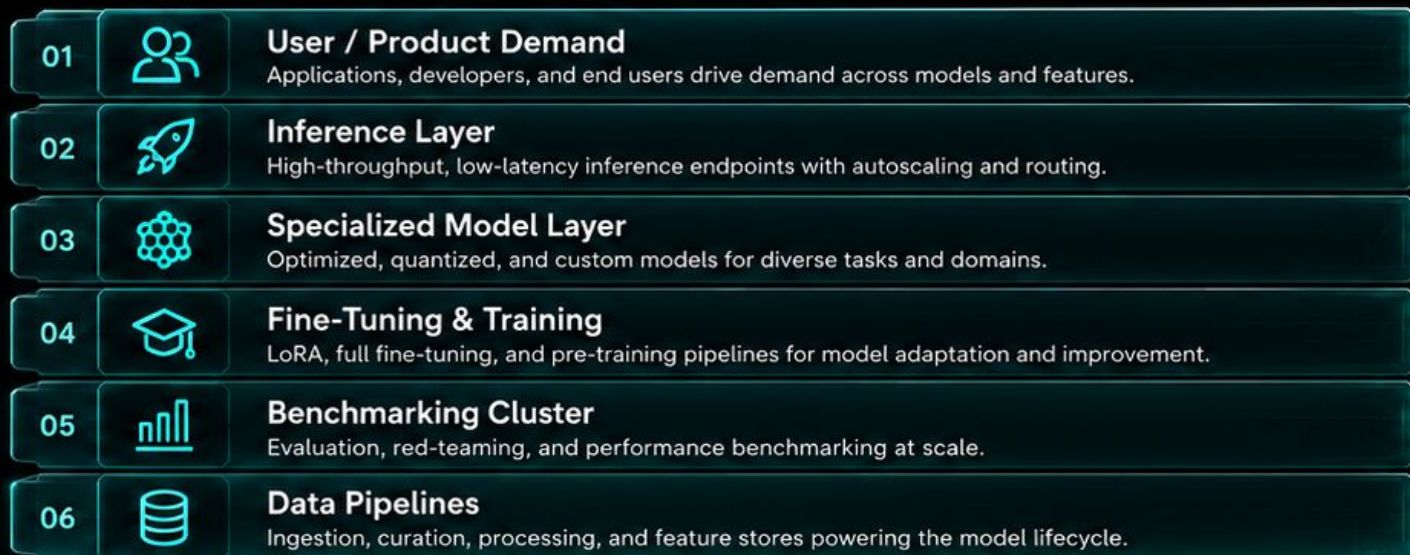

SAFE & RELIABLE DEPLOYMENT

Only the best models graduate to production—monitored and continuously evaluated.

Compute Strategy and Infrastructure Buildout

Hybrid compute is the foundation for scalable inference, fine-tuning, benchmarking, and enterprise workloads.

Hybrid Compute Fabric

Orchestrated blend of cloud GPU, dedicated infrastructure, and edge capacity.

OPERATIONAL INTELLIGENCE

Cloud GPU Capacity

Elastic access to best-in-class GPUs for burst and scale.

Private / Dedicated Workloads

Secure, isolated environments for sensitive and regulated workloads.

Cost Optimization

Smart scheduling, autoscaling, and workload-aware placement.

Model Routing

Intelligent routing across models and regions for best outcomes.

Monitoring & Uptime

Real-time observability, alerts, and uptime you can trust.

Scalable

Elastic compute that grows with your demand.

Cost-Aware

Optimize every workload for maximum efficiency.

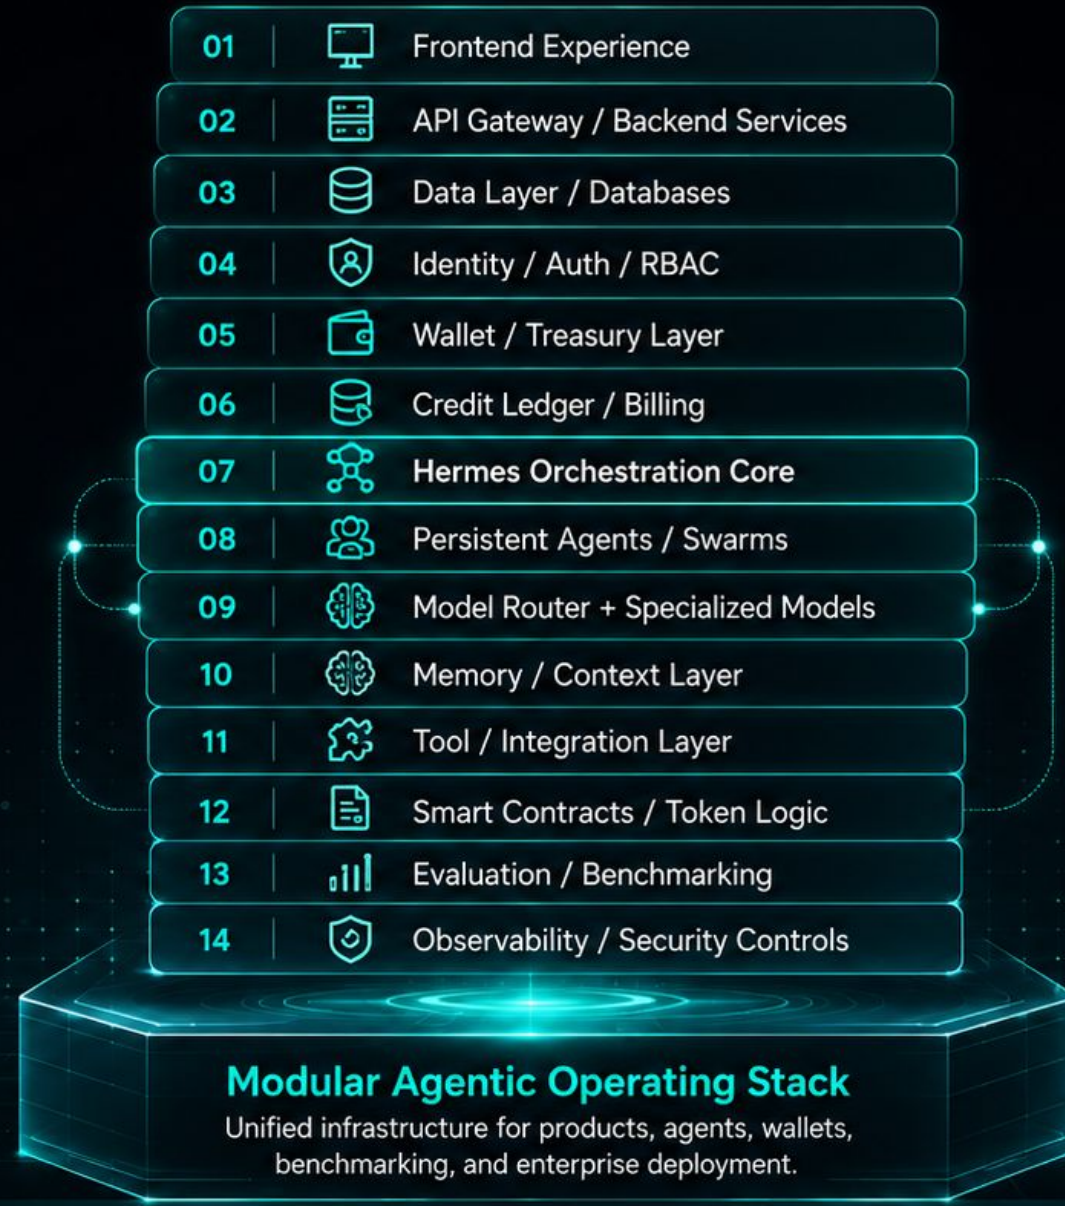

Performance-Driven

Deliver consistent, high-performance experiences at scale.

Technical Architecture and Security

A modular operating stack spanning identity, wallets, orchestration, persistent agents, model routing, benchmarking, and enterprise-grade controls.

SECURITY CONTROLS

-  RBAC & Permissions
-  Encryption at Rest / In Transit
-  Audit Logs
-  Secrets Management
-  Wallet Policies
-  Treasury Multisig
-  Agent Approval Gates
-  Smart Contract Review
-  Model Safety & Guardrails
-  Monitoring & Anomaly Alerts
-  Compliance / Policy Engine

Modular

Flexible building blocks for rapid product deployment.

Secure

Enterprise controls across wallets, agents, and data.

Intelligent

Orchestration, routing, memory, and evaluation working together.

5. USE OF FUNDS: \$50M RAISE

Strategic deployment for exponential execution.

45-50%

AI Model Development + Compute Infrastructure

GPU clusters, training, inference, fine-tuning, benchmarking.

25-30%

Product Engineering & Platform Development

EVE OS, mobile, web, agents, marketplace, fintech layer.

15-20%

Go-to-Market, Team & Operations

Hiring, partnerships, sales, support, and operations.

10%

Strategic Reserve

Runway, legal/compliance, infrastructure flexibility.

Investing in the foundation to build the **operating layer** for the agentic era.

8. EXECUTION ROADMAP

Phased delivery: product value early, then **intelligence** and **ecosystem scale**.

Executing with precision. Building for the long term.
Creating the **operating layer** for the agentic era.

7. TRACTION & WHAT EXISTS TODAY

Three years in stealth. A massive foundation built. **Momentum is real.**

WHAT WE'VE BUILT (3 YEARS IN STEALTH)

3 YEARS

In stealth mode focused on building the foundation

10+

Specialized agents developed, tested, and iterated

1

Unified agent OS (EVE) powering the ecosystem

1,000+

Tests & evaluations run across models, agents & systems

TBs

Of data processed to train, fine-tune and validate

Production-Ready

Infrastructure & tooling built for scale

STEADY PROGRESS. COMPOUNDING ADVANTAGE.

WHAT EXISTS TODAY

EVE OS (v0.x)

The core operating system for AI agents

DEVELOPER SDK

Build, deploy, and scale agents with ease

AGENT FRAMEWORK

Modular, composable framework for any use case

DATA & MEMORY LAYER

Unified memory and context for persistent intelligence

SECURITY & IDENTITY

Decentralized identity, permissions, and trust

LIVE, TESTED, AND USED.

The foundation is live. The community is growing.
The future is being built—today.

INVESTOR SUPPORT

Backed by a select group of strategic investors who believe in our long-term vision.

(Details available under NDA)

STRATEGIC PARTNERSHIPS IN PROGRESS

Building key partnerships across compute, infrastructure, security, and go-to-market to accelerate the agent economy.

(To be announced)

Focus on Deep Tech

Move Fast with Precision

Build for the Ecosystem

Operate with Trust & Integrity

BUILT IN STEALTH. | BUILT TO LAST. | BUILT FOR THE AGENTIC ERA.

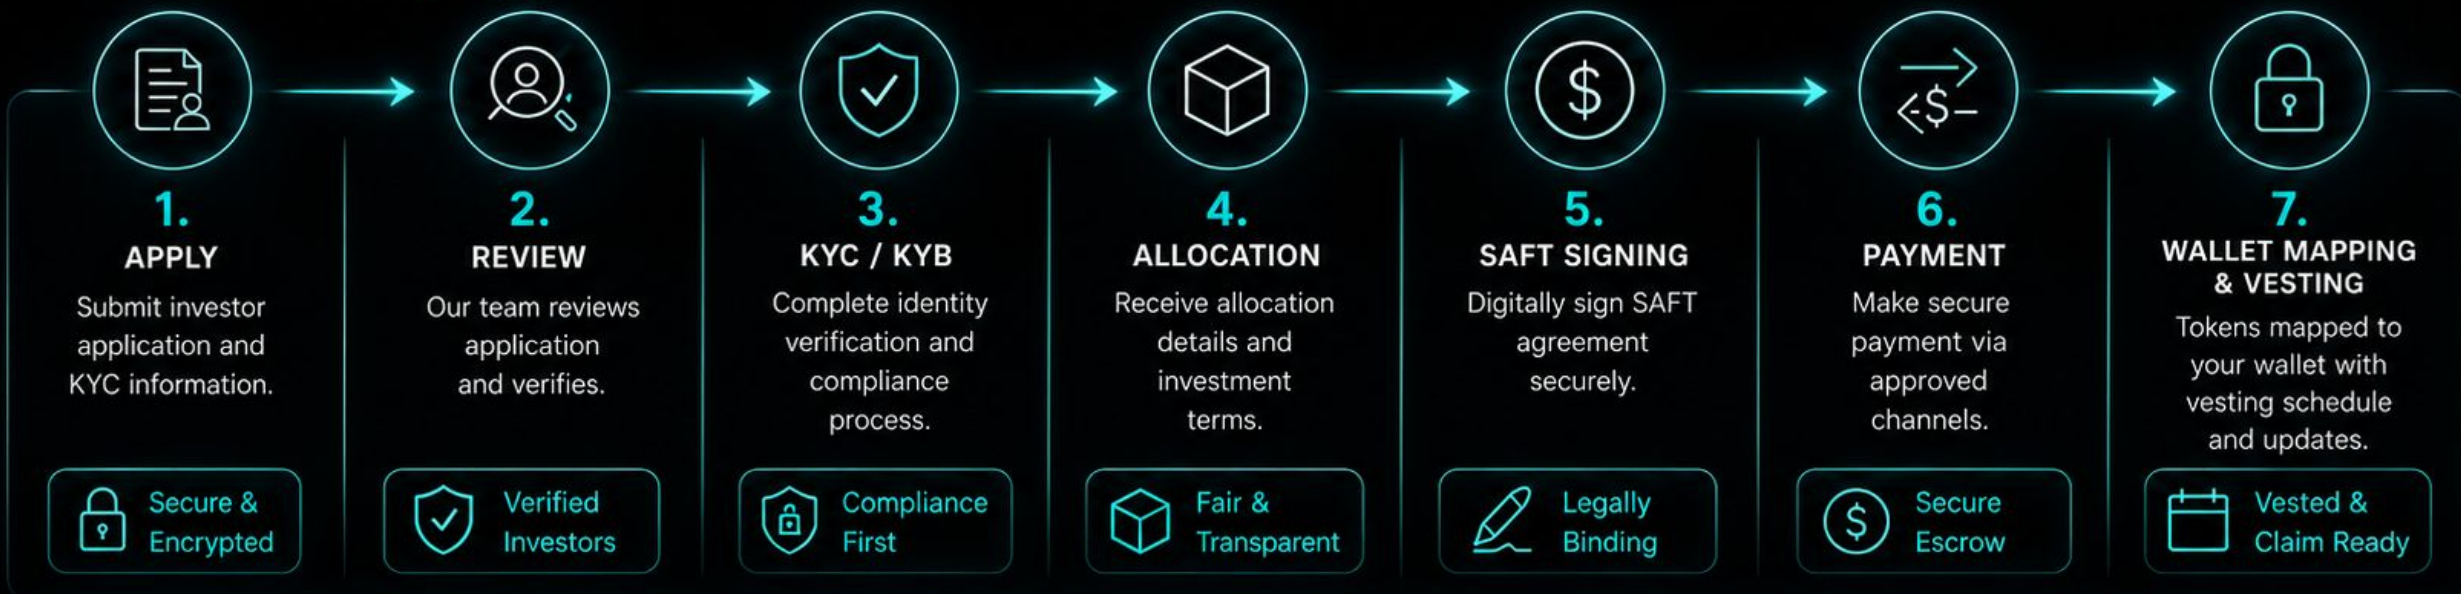

Platform Expansion Flywheel

One infrastructure layer, many products, compounding intelligence.

10. INVESTOR PARTICIPATION FLOW

Simple. Secure. **Transparent.**

WHAT YOU GET

Real-time updates on raise progress and milestones.

Transparent terms, clear rights, and no hidden clauses.

Secure infrastructure protecting your data and assets.

Direct communication with the AlcreatesAI team.

Long-term alignment in the growth of the agentic economy.

**A PROFESSIONAL, SECURE,
AND SEAMLESS INVESTOR EXPERIENCE.**

11. THE ASK

We are raising **\$50M** to build the **operating layer** for the agentic era.

\$50M RAISE

To build, scale, and own the future of
AI agents, compute, and intelligent infrastructure.

USE OF FUNDS

45-50%

AI MODEL DEVELOPMENT & COMPUTE INFRASTRUCTURE

Expand our GPU cluster, build core models, and advance our infrastructure stack.

25-30%

PRODUCT ENGINEERING & PLATFORM DEVELOPMENT

Build world-class developer tools, agent OS, and enterprise-grade platform capabilities.

15-20%

GO-TO-MARKET & OPERATIONS

Scale our team, partnerships, marketing, sales, and global operations.

10%

STRATEGIC RESERVE

Runway, legal/compliance, infrastructure flexibility.

INVESTOR OPPORTUNITY

EARLY ACCESS

Invest at the foundation of a trillion-dollar agentic economy.

HIGH GROWTH POTENTIAL

Large market, strong network effects, multiple revenue layers.

BUILT FOR LONG TERM

Sustainable infrastructure, defensible moats, and aligned incentives.

GLOBAL IMPACT

Powering the next wave of innovation across industries and economies.

KEY TERMS

INSTRUMENT

SAFT

Simple Agreement for Future Tokens

DISCOUNT

To be disclosed in offering materials.

VESTING

Linearly vested over 24 months with 6-month cliff.

LOCK-UP

6-month lock-up from TGE.

GOVERNANCE RIGHTS

Aligned with long-term vision and community participation.

THIS IS MORE THAN A ROUND. IT'S THE FOUNDATION OF THE AGENTIC ECONOMY.
PARTNER WITH US TO BUILD THE OPERATING LAYER FOR THE FUTURE.

12. THE FUTURE IS AGENTIC

AlcreatesAI is the **operating layer** for the next era.

**ONE OS.
INFINITE AGENTS.
LIMITLESS IMPACT.**

We are building the intelligence backbone that will power millions of agents, transform industries, and unlock unprecedented economic value.

OUR VISION

EMPOWER EVERY AGENT

Give every agent the tools, memory, and autonomy to create real-world value.

TRANSFORM EVERY INDUSTRY

Enable agents to reimagine how work gets done across every sector.

DRIVE EXPONENTIAL GROWTH

Build a platform that scales intelligence, not just infrastructure.

BUILD TOGETHER

A community of builders, partners, and investors united by a shared mission.

CREATE LIMITLESS IMPACT

Solve humanity's biggest challenges with intelligent, agentic solutions.

THE OPERATING LAYER FOR THE AGENTIC ERA
Let's build the future—together.

JOIN US

Become a founding investor.

BUILD WITH US

Partner to shape the agentic economy.

OWN THE FUTURE

Be part of the most important infrastructure of our time.
